

STANDARD DUTY RECTANGULAR RECYCLING CONTAINERS

Standard Duty specifications are used by haulers who prefer a heavier gauge steel on their containers which can help provide a longer life expectancy for the container.

With multiple designs to fit most any needs, these containers are designed and built to be user-friendly and with openings that will enable you to haul various materials with only one (1) container.

Recycling Containers can be built to fit any size truck/hoist with either Cable Hook up or Hooklift set up or a combination of both.

Specifications for Standard Duty containers:
